Python for Data Science Practical

Practical - I

Roll No. :43	Name:NIKITA TIWARI
Class :SYIT	Batch : 1
Date of Assignment :15/07/26	Date/Time of Submission :15/07/26

1a. Write a python code to print your profile.

OUTPUT:

A screenshot of a Python IDE window titled 'python for data struture 1.py - C:/Users/info/OneDrive/Desktop/python for data struture 1.py (3.14.6)'. The menu bar includes File, Edit, Format, Run, Options, Window, and Help. The code in the editor is as follows:

```
name = (input(" Enter your Name: "))
age = int(input ("Enter your age:"))
contact = int(input("enter your number:"))
roll  = int(input("enter your roll no :"))
Class = (input("enter your class:"))
```

CODE:

```
>
= RESTART: C:/Users/info/OneDrive/Deskt
1.py
Enter your Name: NIKITA TIWARI
Enter your age:19
enter your number:9967307428
enter your roll no :43
enter your class:SYIT
>
```

1b. write a python code to print addition of two numbers.

```
num1= float(input("enter the first number :"))
num2= float(input("enter the second number :"))
sum = num1+num2
print("the sum is:",sum)
print("nikita__43")
```

Output:

```
1.py
enter the first number :48
enter the second number :21
the sum is: 69.0
nikita__43
|
```

1c. Write a python code to print square root of number.

```
import math

# Input a number from the user
num = float(input("Enter a number: "))

# Calculate square root
square_root = math.sqrt(num)

# Display the result
print("The square root of", num, "is", square_root)
```

Output:

```
==== RESTART: C:/Users/info/OneDrive/Python/Python27/python.exe
Enter a number: 4
The square root of 4.0 is 2.0
>
```

1c. Write a python code to calculate area of Triangle.

code:

```
# Input base and height from the user
base = float(input("Enter the base of the triangle: "))
height = float(input("Enter the height of the triangle: "))

# Calculate area
area = 0.5 * base * height

# Display the result
print("The area of the triangle is:", area)
```

Output:

```
==== RESTART: C:/Users/info/OneDrive/Python/Python27/python.exe
Enter the base of the triangle: 6
Enter the height of the triangle: 10
The area of the triangle is: 30.0
```

1d. Write a python code to swap two variables.

```
python ds.py - C:/Users/info/OneDrive/Desktop/python ds.py (3.14.b)
File Edit Format Run Options Window Help
# Input two variables from the user
a = input("Enter first value: ")
b = input("Enter second value: ")

# Swap the variables
a, b = b, a

# Display the swapped values
print("After swapping:")
print("First value =", a)
print("Second value =", b)
```

code:

```
===== RESTART: C:/Users/info/OneDri
Enter first value: 31
Enter second value: 23
After swapping:
First value = 23
Second value = 31
>> |
```

output:
